SKILLS

- **Languages:** Java, JavaScript, C, C++, Python, HTML, SQL
- **Frameworks & Libraries:** Spring Boot, Spring MVC, React.js, CSS, Maven
- **Backend & APIs:** RESTful API Design, JWT, Spring Security, MVC Design Pattern
- **Tools/Platforms:** GitHub, Postman, Figma, VS Code, IntelliJ IDEA, Docker
- **Core CS:** Data Structures & Algorithms, OOP, SDLC, JUnit 5, Unit and Integration Testing
- **Soft Skills:** Collaboration, Adaptability, Flexibility, Attention to Detail

PROJECTS

- **Patient Management System | Java, Spring Boot, Microservices** Apr 2026 – Present
 - Architected a microservices-based healthcare backend with 5 independent services (Patient, Billing Auth, Analytics, API Gateway), implementing inter-service communication via REST and gRPC, with Apache Kafka enabling asynchronous, event-driven communication between services; leveraged IntelliJ IDEA Codex for prompt-assisted development, with all generated code manually validated.
 - Implemented JWT-based authentication and authorization using Spring Security, exposing 5+ RESTful API endpoints for full CRUD operations on patient records in PostgreSQL, with services containerized using Docker and tested locally against AWS LocalStack.
 - Wrote integration tests using JUnit 5 and REST Assured to validate authentication flows and patient API endpoints (valid/invalid login, authorized data retrieval), ensuring API reliability across services.**Tech Used:** Java, Spring Boot, Spring Security, gRPC, Kafka, PostgreSQL, Docker, AWS LocalStack, JUnit 5
- **E-Commerce Platform Backend | Java, Spring Boot** Nov 2025 – Dec 2025
 - Built a scalable E-Commerce backend with Spring Boot exposing 15+ REST APIs for full CRUD operations across 6 entities (Customer, Product, Cart, Order, Order Item, Category).
 - Designed complex JPA entity relationships (OneToOne, OneToMany, ManyToMany) with transactional service logic and profile-based DB switching (H2/MySQL).
 - Integrated Spring Boot Actuator for monitoring and applied clean layered architecture with Jakarta Validation and Lombok.**Tech Used:** Java, Spring Boot, Spring Security, JWT, Spring Data JPA, Hibernate, MySQL, REST APIs, Git
- **LawEZY - AI Legal Assistance Platform** Aug 2025 - Sept 2025
 - Developed a responsive legal-tech web platform using HTML, CSS, and JavaScript, connecting clients with legal advisors through real-time chat, document upload, and case tracking features
 - Integrated an AI chatbot for 24/7 legal query resolution and designed secure RESTful APIs for appointment Scheduling and lawyer-client matching workflows
 - Built robust APIs to ensure smooth, reliable communication between the platform and the database, delivering a seamless, user-friendly workflow**Tech Used:** React.js, MongoDB, REST APIs, JWT, Postman (Testing)

TRAINING

- **Think Design Prototype – Training on design thinking and Figma** Jul 2025 - Aug 2025
 - Gained hands-on experience with Figma for creating interactive wireframes and UI prototypes.
 - Worked on designing end-to-end product flows, improving skills in prototyping and visual design.
 - Designed a Personality-based event discovery platform with interactive wireframes and user flows in Figma.

CERTIFICATIONS/CERTIFICATES

- Postman API Fundamentals Student Expert | [Postman](#) Mar 2026
- Java Programming – Self Pace | [GFG](#) Jan 2026
- Linux Mastery: From Basic to Advance | [GFG](#) Nov 2025
- Responsive Web Design | [Freecodecamp](#) Nov 2023

ACHIEVEMENTS

- Solved 200+ DSA problems across LeetCode & other platforms Mar 2026

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.15** Aug 2023 - Present
- **Tirumala Educational Institute** Bhimavaram, Andhra Pradesh
Intermediate; **Percentage: 98%** Jun 2022 - Apr 2023
- **Tirumala Educational Institute** Bhimavaram, Andhra Pradesh
Matriculation; **Percentage: 98%** Jun 2020 - Mar 2021
